

PHILIPS

An introduction to Philips

September 2022

innovation ✨ you

Philips has reinvented itself many times

**Founded on innovation
and entrepreneurship**

**Expanding
beyond lighting**

**Global expansion
post-WWII**

**Diversified industrial
conglomerate**

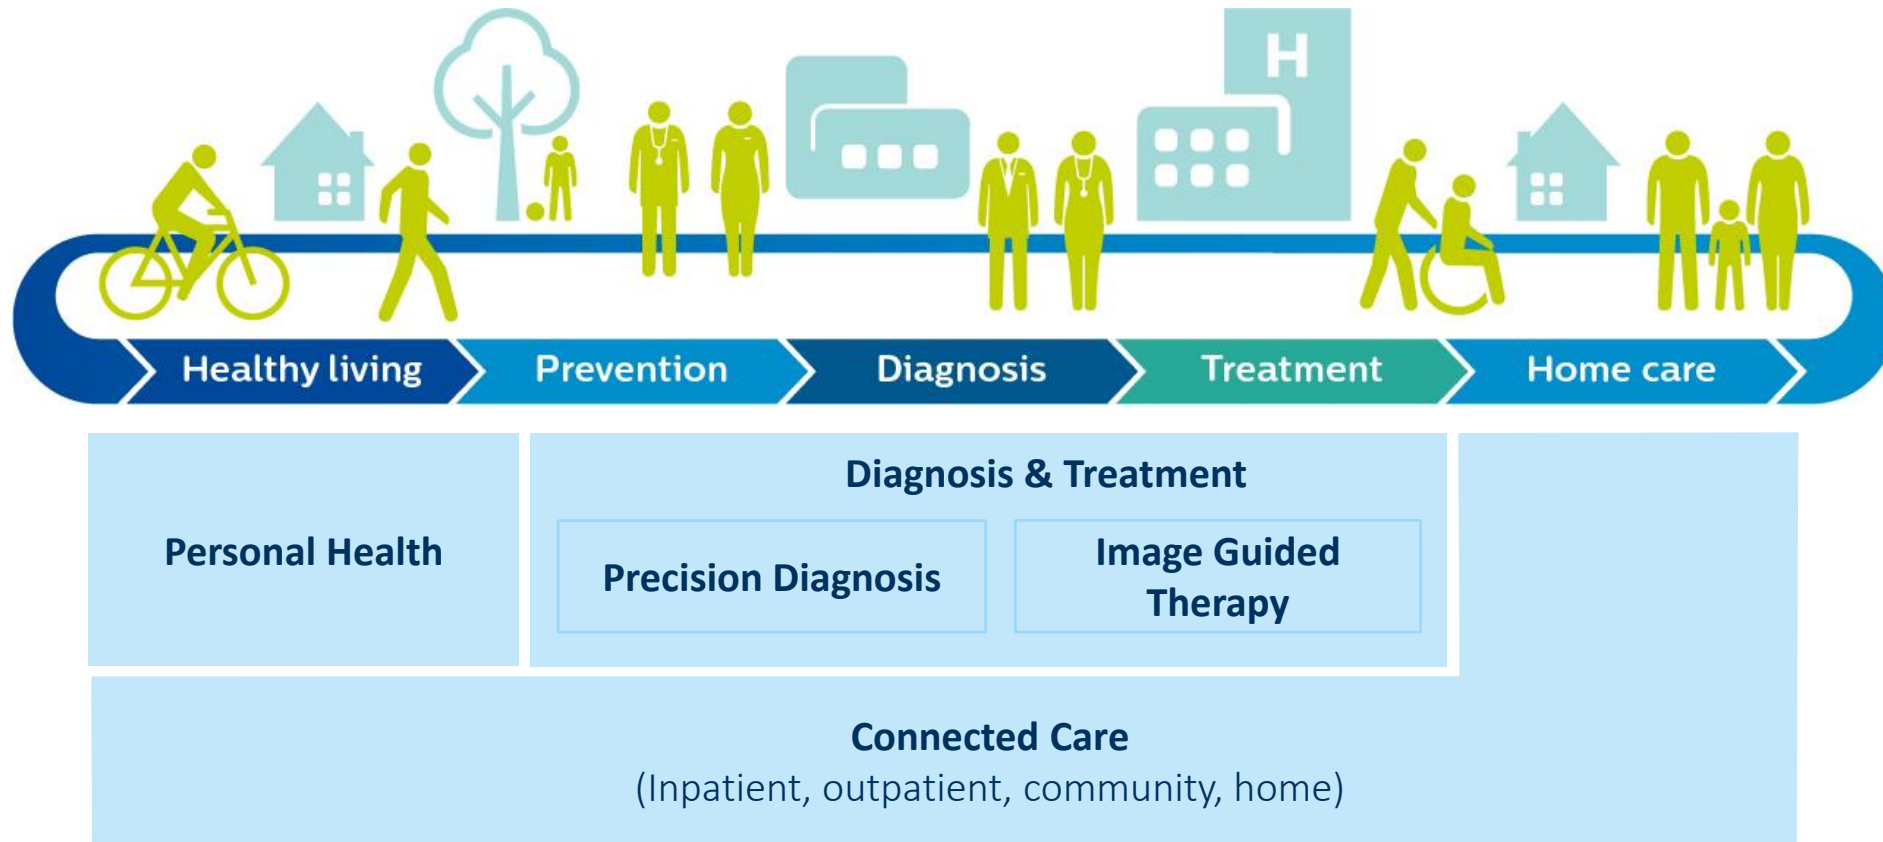

**Strategic portfolio
choices sharpening focus**

Our journey
continues...

We are focused on unmet customer needs in healthcare

The health continuum is at the center of our strategy

Helping our customers address the Quadruple Aim

Better health outcomes

Improving the health of
individuals and populations

Improved patient experience

Improving the patient
experience of care (including
quality and satisfaction)

Improved staff experience

Improving the work life
of health professionals

Lower cost of care

Reducing the per capita
cost of healthcare

Philips is well positioned to respond to long-term trends

Telehealth

Bedside Critical Care

Tele-ICU

Remote screening & monitoring

Digital pathology

Interoperability

COVID-19 data exchange portal, Philips Interoperability Solutions ¹

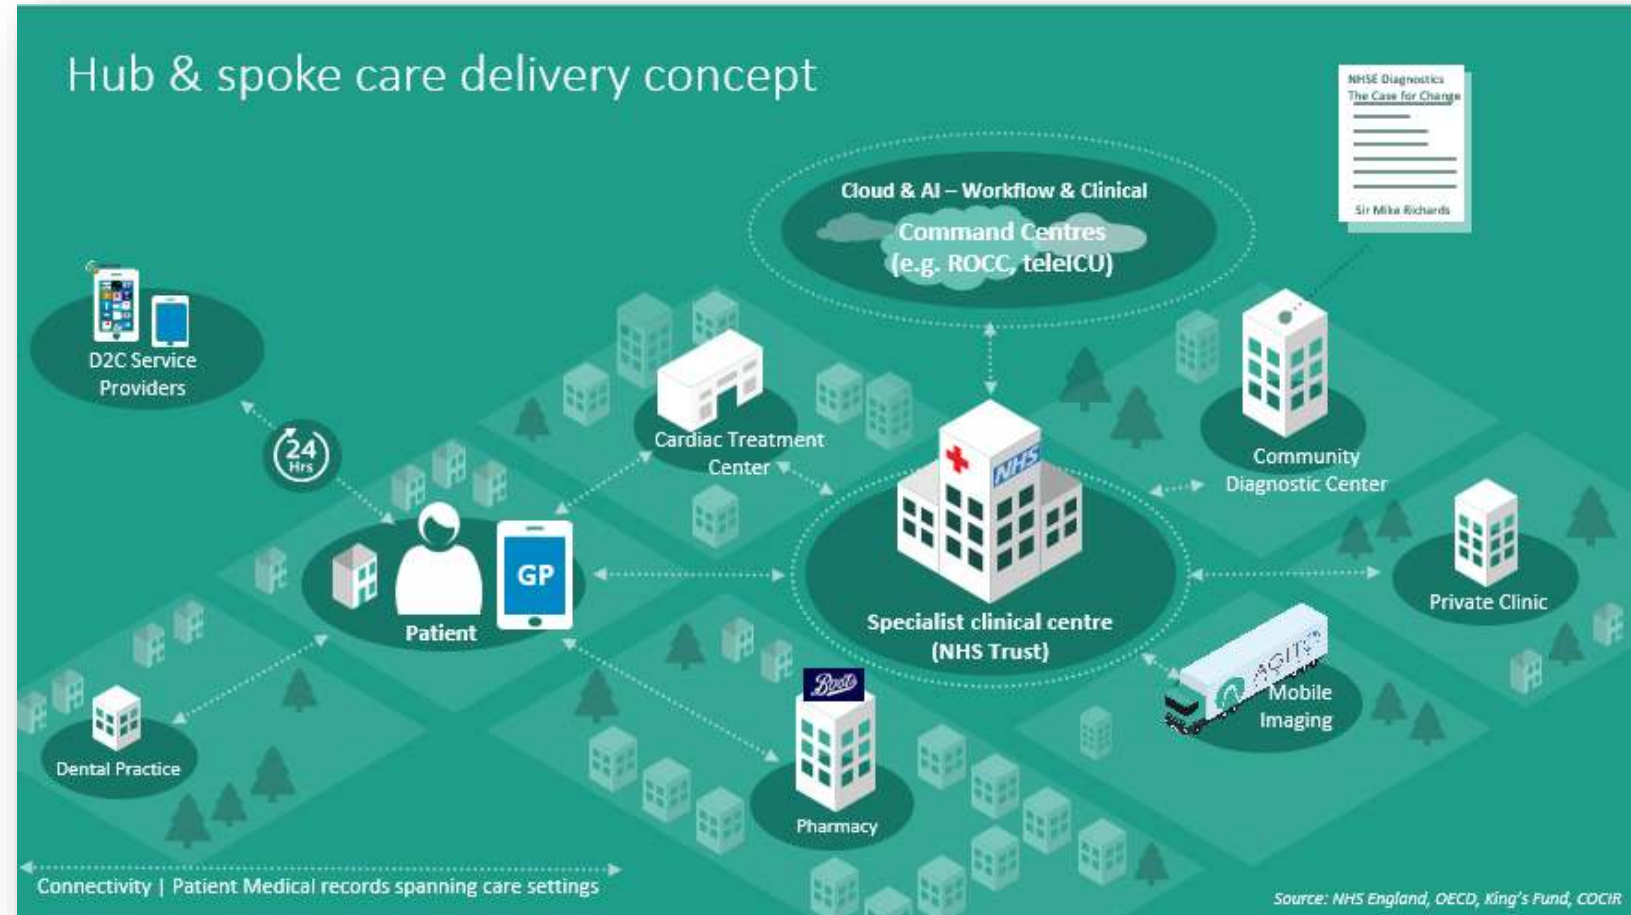

21st Century Cures Act: access, exchange & use of Electronic Health Info.

Our vision for health systems resilience centers upon a distributed care model

System features:

- Virtual collaboration and command center structures deployed at scale
- Focus on care pathway optimization – oncology, cardiovascular and stroke; managing co-morbidities
- Ramp up in elective procedures at specialist centers, e.g., community diagnostic centers, clinics and labs
- Continuous remote monitoring & integrated tele-ICU networks
- Investment in HC workforce – productivity and workflow highly prized
- Emergency stockpiles of PPE, MedTech equipment and therapies
